Force Protection/Antiterrorism Highlight

Ten Things Every Employee Can Do to Make a Security Difference

Many employees have asked what they can do to improve our security posture, with the start of military operations against Iraq. The TACOM AT/FP Office has identified the following 10 measures that each employee can do that will help detect, deter, and defeat a potential terrorist attack.

1. **Wear and display your installation access badge proudly! Challenge individuals who fail to display their badge.**
2. **Escort visitors that are not authorized unescorted access to your installation or facility.**
3. **Know who and what belongs in your work areas, and report suspicious personnel, packages, vehicles, or activity to your supervisor and Security Office, promptly.**
4. **Do not leave packages, briefcases, hand bags, or backpacks unattended in common areas.**
5. **Remove excess items from your privately owned vehicle to facilitate quicker vehicle inspections at access control points.**
6. **Comply with parking policies, parking stand-off distances, and do not park or leave an unattended vehicle in a no parking or restricted parking area.**
7. **Familiarized yourself with fire evacuation and bomb threat response procedures.**
8. **Comply with instructions you receive from your Supervisor and Security Officials.**
9. **Properly handle, use, transmit, and store sensitive, and classified information.**
10. **If traveling OCONUS (on leave or TDY) receive your Level I Antiterrorism/Force Protection Briefing within 2 months of your departure.**
